| <p>Cat: CAESAR DOB: 07/01/2017 Sex: Male Breed: Maine Coon Microchip: 380260100642124 Color: Red silver blotched</p> | <p>Reg: IT* ANFI LO 143099</p> |
| <p>Sire: IT* EL NINO BILLANDCOO Dam: IT* DELAFORCE FUR FUR DREAMING</p> | <p>Reg: CZ*CSCH LO 970/16/MCO Reg: RU* 0170-28/2015-276/LO/MCO</p> |

Maine Coon HCM Test Result

N/N

Result Codes:

| | |
|-------------|---|
| N/N | Normal. |
| N/HCMmc | One copy of the A31P mutation is present. Cat is 1.8 times more likely to develop HCM than cats without the mutation. |
| HCMmc/HCMmc | Two copies of the A31P mutation are present. Cat is 18 times more likely to develop HCM than cats without the mutation. |

This test only detects the A31P mutation associated with HCM in Maine Coon cats and outcrosses as described by Meurs et al. 2005. The A31P mutation is not the sole cause of HCM in Maine Coons. The other causes are not known at this time.
